

HOW TO UTILIZE TELEMEDICINE

WHAT IS TELEMEDICINE?

Telemedicine is a method of delivering medical care where all care is given remotely. This can include live visits with your doctor or online inquiries where your medical provider can assess your condition and even prescribe you medications.

WHY USE TELEMEDICINE?

Telemedicine is a great resource for patients at risk for illness. Patients can receive quality care from the comfort of their own home so they can reduce the risk of exposure to illness.

WHERE DO I START?

Check with your medical care provider to find out how they deliver telemedicine to your community.
