What Are Some Common Healthcare Obstacles and Ideas for Addressing Them?

- If you do not have health insurance or are worried about paying your copays, there are several online resources and advocacy groups that can help.
- If transportation is a challenge, talk to your healthcare team about finding a place to be treated closer to home. There are also organizations who provide free transportation to and from treatment.
- If you and your healthcare team don’t speak the same language, ask for materials in the language you are most comfortable with and a translator to join you for appointments.

What Can I Do to Get the Best Care Possible?

- Let your healthcare team and family know if something is getting in the way of you receiving the care you need.
- Make use of your whole healthcare team. Each member is there to help you throughout your journey.
- Involve a friend or loved one in your care.
