

Questions to Ask Endometrial Cancer Testing	Factors That May Impact Treatment Options
<ul style="list-style-type: none"> ▪ What tests will I undergo? ▪ Are there additional biomarkers we should be testing for that weren't tested for in the upfront setting? ▪ What is the outcome of these tests? ▪ Do you feel you have a complete picture of my cancer? 	<ul style="list-style-type: none"> ▪ Patient's overall health and any co-existing conditions ▪ Test results, including biomarker testing. ▪ Stage and extent of disease ▪ Microsatellite instability (MSI) and mismatch repair deficiency (dMMR) status
Clinical Trial Phases	
<ul style="list-style-type: none"> • Phase I: The goal is to test the safety of the drug, finding the appropriate dose that produces the fewest side effects. • Phase II: Further assesses the safety of the drug and the effectiveness of the treatment. • Phase III: Compares the efficacy of the new treatment to the standard-of-care treatment. • Phase IV: Study that looks at drugs that have already been approved to get additional safety information and learn more about long-term benefits and side effects. 	
Glossary	

Biomarker: Measurable substances found in the blood, urine, or tissues of some people with cancer. Biomarkers may also refer to mutations, changes, or patterns in a tumor's DNA.

Biomarker Testing (molecular testing): Laboratory testing that identifies certain genes, proteins, or other molecules in a sample of tissue, blood, or other body fluid. In cancer, it may also be used to evaluate treatment or to make a prognosis.

CA-125 (Cancer antigen 125) Test: Looks for high levels of CA-125, which could be a sign of endometrial cancer.

Immunotherapy: Type of therapy that harnesses one's own immune system to help the body fight cancer, infection, and other diseases.

PARP Inhibitors: A type of targeted treatment that inhibits the enzyme poly (ADP-ribose) polymerase.

Placebo: An inactive drug or treatment with no therapeutic benefit.

Standard of Care: An established guideline that is consensus among experts as the most appropriate and/or effective treatment for a specific type and stage of cancer.

Endometrial Cancer Resources	About Evolve Endometrial Cancer
<ul style="list-style-type: none"> ▪ American Cancer Society ▪ The Foundation for Women's Cancer ▪ FORCE (Facing Our Risk of Cancer Empowered) ▪ SHARE Cancer Support ▪ The Society of Gynecologic Oncology 	 <p>Evolve Endometrial Cancer is brought to you by the Patient Empowerment Network. It is sponsored by GSK and through generous donations from people like you.</p>
